The Time for EMR is Now!

Concerned that implementing and using an EMR will slow you down? While most companies require 6-9 months, we'll get you up to speed in 15 days. Guaranteed!

gloStream
15-DAY SUCCESS GUARANTEE

At gloStream, we believe your EMR implementation should take place quickly and include the in-person training you need to keep your business going strong both during and after your software is implemented. While most EMR companies require 6-9 months to get practices back to normal after implementation completion, gloStream does it in 15 days or less. We guarantee that if we can't get your practice back to full patient load within 15 days of your EMR implementation completion date, we'll refund your entire gloStream software and services purchase. With gloStream, you can be confident that your EMR purchase will help your business succeed and won't cause it to falter.

gloEMR® is the only electronic medical record with Microsoft® Office built right in.
